# Azure App Configuration with SpringBoot

By TecheStop

### Agenda

- Introduction to Azure App Configuration.
- Creation of App Configuration instance in Azure.
- Java project setup and walkthrough.
- Application configuration Auto refresh demo.
- Using spring profiles with App Configuration.

#### Introduction to Azure App Configuration

Azure App Configuration provides a service to centrally manage application settings and feature flags. This helps us implement one of the key recommendation from <a href="Twelve Factor App">Twelve Factor App</a> guide is to separate configuration from code.
